

REMARKS

In light of the above amendments, the Applicants submit that the amendment to the claims now includes a complete and proper listing of all of the claims, and is now in compliance with the provisions of 37 CFR §1.121. The amendments to claims 1-36 include revision marks and history notifications as if they were included with the most recent Response to the Office Action mailed May 9, 2005.

With respect to the amendment of the claims 1-36, the Applicants submit that the specification and originally filed claims include subject matter to support the added claim elements, including the elements directed to (i) the application service provider (ASP), (ii) the ASP including at least one server being adapted to receive (and method including receiving) from a client a request for carrying out at least one service associated with an exchange of telemetry data between an on-vehicle telemetry module and the at least one server, (iii) the at least one service being associated with a cost, and (iv) the at least one server being adapted to confirm (and method including confirming) the fee or cost of the service before carrying out the service. See, for example, the specification at pages 4 to 9, Figures 2-4, and originally filed 1, 11, 14-19, 25-36 for support of the present amendments.

Similarly, the Applicants submit that new claims 37-99 are fully supported by the specification. See the entire specification of the present application, Figures 2-4, and all of the originally filed claims for support. In addition, the Applicants submit that the new claims do not add new matter.

Therefore, the Applicants request that the amendment be considered with the corresponding application. The Examiner is respectfully requested to contact Applicants' representative below at (312) 913-0001 if any questions arise or if he may be of assistance to the Examiner.

Respectfully submitted,

McDONNELL BOEHNEN
HULBERT & BERGHOFF
